

AUTOMOBILE SERVICE SOFTWARE

Invoicing software built for how a service bay actually bills a job

A service job is never just parts or just labor — it's both, on the same invoice, usually against a customer waiting on the bay. Invoice2Track bills parts straight from stock and labor hours together, and keeps a booking calendar so two cars don't land on the same bay at the same time.

How it works

- 1 Book the bay slot**
Reserve a bay and time for the job, checked against the calendar so a customer's drop-off time is never a guess.
- 2 Pull the spares**
Spares used on the job are billed straight from stock, deducting automatically as they're added to the invoice.
- 3 Add the labor**
Labor hours sit right alongside the parts on the same invoice — no separate labor slip to reconcile.
- 4 Restock as needed**
Low spares surface for reorder from your regular vendors, with purchase history tracked per part.
- 5 Bill the job**
One invoice covers parts and labor together, ready the moment the car's out of the bay.

Key capabilities

• Parts + labor on one bill Spares deduct from stock automatically as they're billed; labor lines sit right alongside them.	• Spares inventory Full stock control for the parts you actually carry, with vendor purchasing to restock them.
• Bay appointment booking A shared calendar keeps service slots from clashing, so a customer's drop-off time is never a guess.	• GST-ready billing Turn on GST billing and every printed invoice applies the correct tax treatment automatically.
• Vendor purchasing Track supplier purchase orders and history against every spare part, all in the same system as your sales.	• Vehicle service history Every past job and invoice is on record against the customer, ready to reference the next time their vehicle comes in.
