

DOCTOR / MEDICAL CLINIC SOFTWARE

Invoicing software built for how a clinic actually schedules and bills

A clinic runs on the same core problem as a studio or salon: a patient needs a slot, and two patients can't land on the same doctor or exam room at the same time. Invoice2Track checks every appointment against the calendar before confirming it, bills consultations and procedures the same way any professional service is invoiced, and optionally tracks the medical supplies dispensed along the way — without forcing a clinic that doesn't need stock control to deal with it.

How it works

- 1 Book the appointment**
Reserve a doctor, room, or slot, checked against the calendar before it's confirmed — no double-booked exam rooms.
- 2 See the patient**
Conduct the consultation or procedure as scheduled.
- 3 Bill the visit**
Consultations and procedures are billed as Service line items at their set price, the same as any professional service.
- 4 Add supplies if used**
If medicines or supplies were dispensed, add them to the same invoice — tracked and deducted from stock if that's turned on.
- 5 Invoice the patient**
One clear invoice covers the visit and anything dispensed, ready for the patient at checkout.

Key capabilities

• Patient appointment booking Book a doctor, room, or slot with the same overlap-checking that powers gym and salon bookings — nothing gets double-booked.	• Service-based billing Consultations and procedures are set up as Service products with their own price, billed as an invoice line the same as any professional service.
• Optional supplies tracking Medicines or supplies dispensed on-site can be stocked and tracked with vendor purchasing to restock — on by default, but never required if a clinic only bills for the visit.	• GST-ready billing Turn on GST billing and every printed invoice applies the correct tax treatment automatically.
• Doctor & room scheduling Every appointment checked against a doctor's and room's existing bookings before it's confirmed.	• Patient billing history Every past visit and invoice is on record against the patient, ready to reference at their next appointment.
