

EVENT MANAGEMENT SOFTWARE

Invoicing software built for how an event company actually bills a job

An event company bills rental equipment and services on the same invoice, almost always tied to a specific date and venue. Invoice2Track keeps the booking date and venue front and center on every estimate and invoice, with rental stock and service lines living side by side.

How it works

- 1 Book the event date and venue**
Every estimate carries its own booking date, time, and venue address from the start.
- 2 Quote rentals and services together**
Equipment rental and service charges sit on the same estimate, not split across separate documents.
- 3 Check the calendar**
See every upcoming event booking in one place before committing to a new date.
- 4 Track rental stock**
Equipment you rent out is tracked like any other stock, so you know what's committed to which event.
- 5 Convert to invoice**
Once the event's confirmed, the estimate becomes the invoice — booking details, rentals, and services all carried through.

Key capabilities

• Rentals + services, one invoice Equipment rental and service charges bill together on the same document.	• Booking & venue details Every estimate and invoice carries its own booking date, time, and venue address.
• Booking calendar See every upcoming event booking in one place, not buried across separate documents.	• Rental equipment stock Track equipment you rent out the same way any inventory is tracked, so what's committed to an event is visible.
• GST-ready billing Turn on GST billing and every printed document applies the correct tax treatment automatically.	• Estimate to invoice A confirmed booking's estimate converts straight into the final invoice, carrying every detail through.
