

PET GROOMING & BOARDING SOFTWARE

Invoicing software built for how a grooming business actually runs

A grooming appointment and a boarding stay are both slots on a calendar that can't overlap, and both usually end with a bag of food or a bottle of shampoo added to the bill. Invoice2Track checks every appointment against the calendar before confirming it, and lets a product ride along on the same invoice as the service.

How it works

- 1 Book the appointment or stay**
Reserve a grooming slot or boarding stay, checked against the calendar before it's confirmed — no overlapping bookings.
- 2 Add the service**
Set the grooming or boarding service as a line item at its usual price, ready for checkout.
- 3 Add anything sold alongside it**
Food, shampoo, or supplies go on the same invoice as the appointment — one checkout, not a separate transaction.
- 4 Stock deducts itself**
Every product sold, whether standalone or alongside an appointment, comes off the shelf without a manual adjustment.
- 5 Bill and go**
One invoice covers the service and anything purchased with it, ready the moment the customer's ready to leave.

Key capabilities

• Appointment booking Book a grooming session or boarding stay with the same overlap-checking used across every other booking-based industry here.	• Service and product on one bill Add food, shampoo, or supplies to the same invoice as the appointment — one checkout, not two separate transactions.
• Stock deducts automatically Every product sold, whether standalone or alongside an appointment, comes off the shelf without a manual adjustment.	• Vendor purchasing Restock food and supplies from your regular suppliers, with purchase history tracked against every product.
• GST-ready billing Turn on GST billing and every printed invoice applies the correct tax treatment automatically.	• Repeat customer tracking Every customer's booking and purchase history is on record, so a regular's preferences aren't starting from scratch each visit.
